Full Environmental Assessment Form
Part 2 - Identification of Potential Project Impacts

Agency Use Only [If applicable]
 Project: Blain Town Square
 Date: April 15, 2026

Part 2 is to be completed by the lead agency. Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency **and** the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

Tips for completing Part 2:

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer "Yes" to a numbered question, please complete all the questions that follow in that section.
- If you answer "No" to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box "Moderate to large impact may occur."
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the "whole action".
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

Full Environmental Assessment Form
Part 3 - Evaluation of the Magnitude and Importance of Project Impacts
and
Determination of Significance

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

Reasons Supporting This Determination:

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

Extensive soil disturbance is proposed to take place for more than one year over an extensive area including areas of steep slope. No plan to mitigate erosion impacts has been provided.

Construction is proposed adjacent to wetlands, with no analysis of the value of the wetland, or scope of disturbance provided.

The project proposes development out of character with the surrounding area and beyond the capacity of existing wastewater and drinking water infrastructure, without a concrete plan for disposal of increased wastewater. It is also unknown whether the aquifer can support the increase withdrawal. The project will create a significant volume stormwater runoff, that may result in impacts to receiving water bodies, and no plan has been provided for treating that stormwater or preventing erosion or flooding.

Endangered and threatened species and habitat may occur on site. Additionally, the project is large enough to substantially interfere with non-protected species that occur on the site. The project sponsor has provided no information or analysis to determine the presence of such resources or the potential for the project to displace or destroy such resources.

The project site will permanently foreclose upon the use of the site and its highly capable soils for agricultural purposes. Additionally, this agricultural land has been identified by the Town of Warwick to be important for conservation due to its agricultural potential, role in aquifer recharge, the presence of wetland and biodiversity, and its importance as open space and greenbelt supporting the rural scenic character of the Town.

Development of the project site may be out of character with the surrounding area and significantly alter the visual landscape of the Town in an area frequented by both commuters and tourists, seasonally and year-round. The rural character of this area is important to support local tourism-based businesses.

The project site is suspected to contain archeological resources that could be destroyed with construction of the project.

The project site will increase traffic at a signalized intersection that experiences significant delays during peak tourism season.

The project site will consume significant amounts of energy to heat and cool proposed buildings.

The proposed project may result in light impacts to the night sky, and intrude upon the operation and enjoyment of existing neighboring users.

and considering both the magnitude and importance of each identified potential impact, it is the conclusion of the
Town of Warwick Planning Board _____ as lead agency that:

A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.

B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:

There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.7(d)).

C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued.
